COMPANY OVERVIEW

Narek Sports Group is a South African company which is involved in Sports Facility Development. Our extensive experience in the development, manufacture, construction, installation and maintenance of sports facilities sets us up as the ideal company to partner with for any sports facility related requirements, such as the construction of sports pitches and courts, whether indoor or outdoor, as well as other key elements such as lighting, fencing, grandstand seating and even tar surfacing with our sports facility infrastructure and landscaping divisions.

The company is provisioned to provide high quality product innovation and turnkey solutions within the industry, building on many years of experience in completing a variety of exciting projects throughout South Africa and neighbouring states. The company's activities are related to the construction of sports facilities that

support various sporting codes, from the design, construction, inspection, consultation and development, to the eventual ongoing maintenance or repair if necessary. We pride ourselves on our customer service, and work tirelessly to satisfy the requirements of each valued client.

Based in Johannesburg, Narek Sports Group has cultivated a reputation as a respected and trusted company which ensures returns on investment. A great deal of research and development has gone into ensuring that our tennis courts, football pitches and othersurfaces are constructed using the latest technology, adhering to the highest standards of quality with the long-term use of our surfaces in mind. We do not simply provide a sportssurface and move on, as we are determined to guarantee the sustainability of every completed project through a maintenance plan that adds further value to our work.

BACKGROUND AND DEVELOPMENT

Narek Sports Group has been operating since 2006. The company was founded by Chairperson and MD of the company, Nyiko Rekhotso, who is still involved in day to day operations for the business.

As a forward-thinking and dynamic company, Narek Sports Group has seen continuous growth during difficult economic times, as our work has consistently exceeded the expectations of our clients. This has allowed us to complete projects throughout South Africa in Gauteng, Limpopo, North West, Mpumalanga, Free State, while even our Southern African neighbours have been the recipients of our efforts with sports surfaces constructed in Angola, Zambia, Swaziland, Lesotho and Botswana.

VISION

We strive to provide the highest quality sports facility development and maintenance delivered through excellent workmanship and service for all customers who entrust their requirements with us, so that our business continues to grow as a trustworthy, reliable and quality company.

MISSION

We endeavour to reach our vision by using our extensive experience and tireless work ethic in our approach to every element of our work, ensuring that we develop and maintain sports facilities in a manner that exceeds expectations consistently and without compromise.

CORE VALUES

- **Quality and Experience** in all sports facility development, maintenance and other work that we produce, adhering to world class standards.
- **Customer Service Excellence** as the norm for all of our customer interactions.
- **Innovation and Dedication** to responding to our customers' evolving needs, while remaining updated on sports facility development advancements.
- **Honesty and Integrity** in all company dealings both internally and externally.
- Safety as an important element of how we do our work, ensuring that our workers have a safe working environment in which to thrive.
- **Respect and Appreciation** for staff, associates and customers.
- **Consistency and Commitment** to maintaining sports facilities for long-term return on investment.

B-BBEE STATUS

Our company has achieved a level one B-BBEE status, while we fully support the B-BBEE Act 53 of 2003 and the Code of Good Practice listed therein. Our B-BBEE verification certificate is available upon request.

CIDB GRADING

Narek Sports Group is registered with the Construction Industry Development Board (CIDB), which has recognised our work with a compliance grading of 5CE PE (Civil Engineering) with regards to civil engineering projects in the sports facility development domain, displaying our experience and the quality of work that we provide in our industry.

MEET THE TEAM

Nyiko Rekhotso – Director & COO

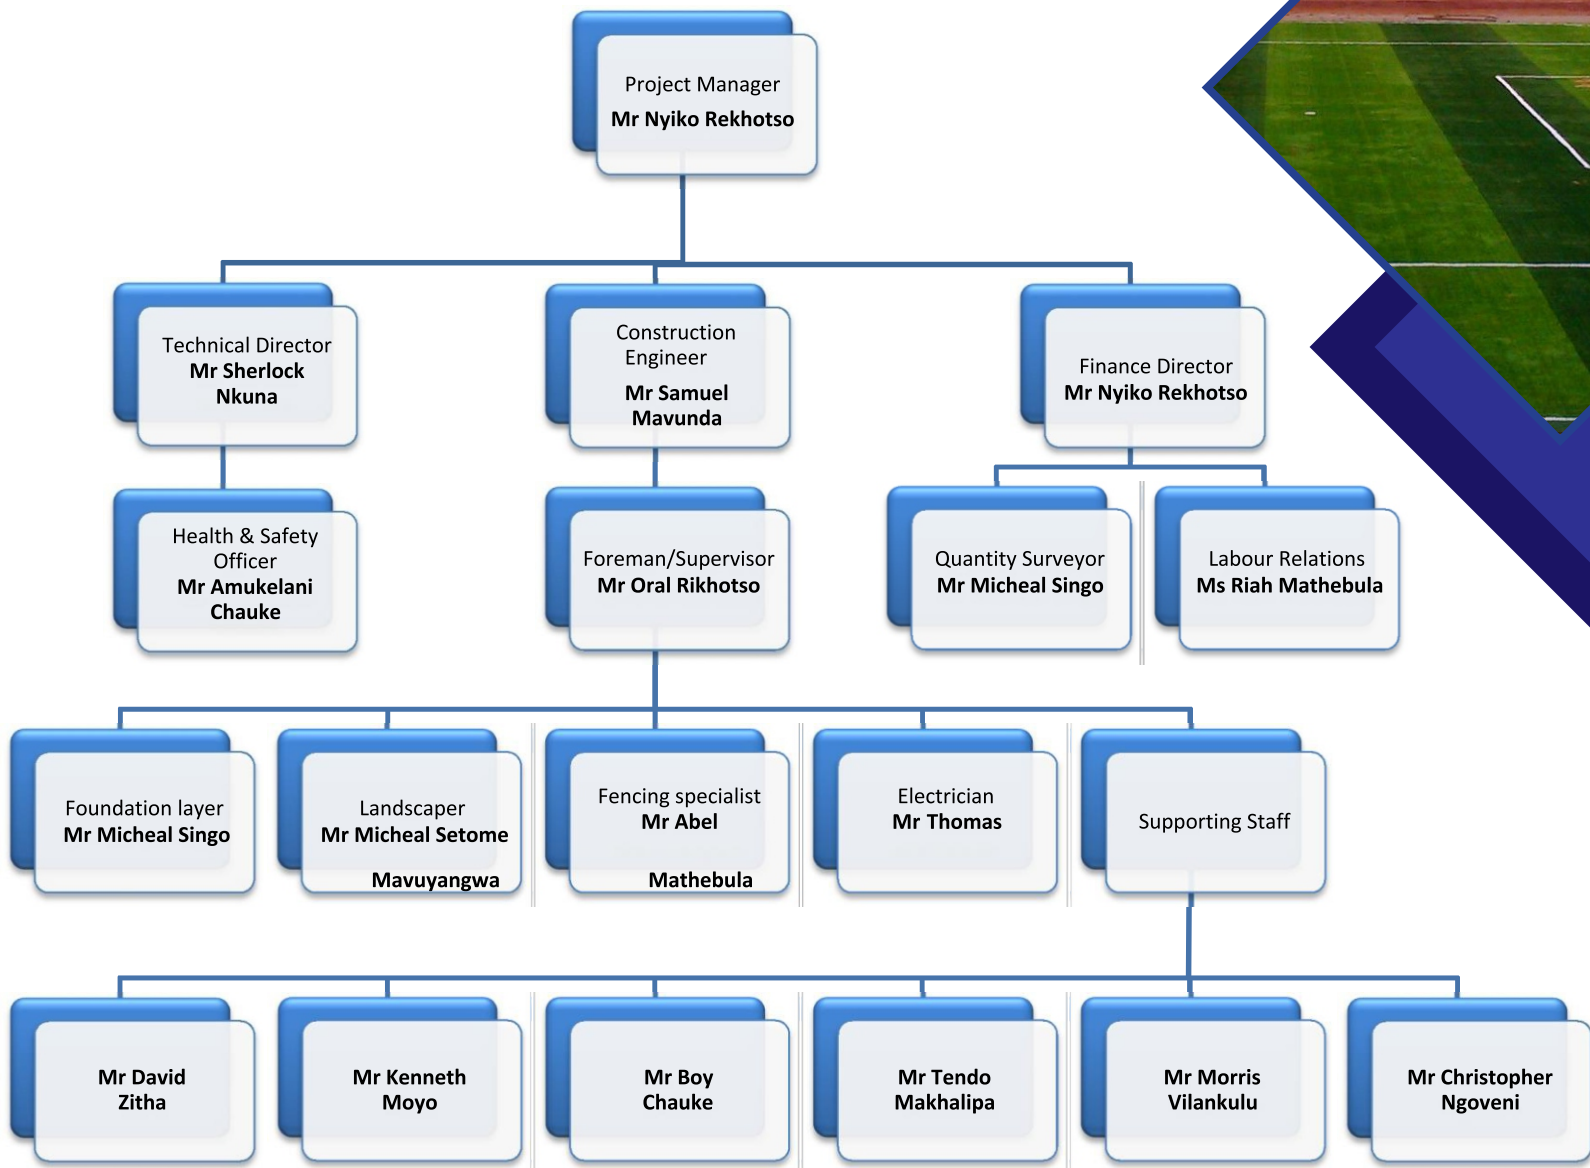

Nyiko Rekhotso established Narek Sports Group in 2006, and has worked with a tireless ethic to grow the company and ensure the upward trajectory that it has experienced, which has allowed it to be involved in many successful projects throughout South Africa, and other Southern African countries.

Technical Team

The company is comprised of a dedicated and focused technical team that represents us proudly and successfully in all of the work they undertake. When the need arises, we hire additional experienced personnel and acquire necessary resources to ensure that we produce excellent work and deliver top quality results consistently.

PROPOSED PROJECT ORGANOGRAM

PREPARED BY: Narek Sports Group

SPORTS FACILITY DIVISION

Narek Sports Group is a trusted and respected sports surface installer. We enjoy partnering with various sports facilities to ensure that they are able to provide people with the highest grade of surface on which to take part in a number of sports.

The below is a selection of sports facilities and related elements which we are able to design, repair, install and maintain for our customers:

- Tennis Courts
- Netball Courts
- Volleyball Courts
- Basketball Courts
- AstroTurf Surfaces
- Synthetic or Artificial Grass Surfaces
- Soccer Fields (Indoor and Outdoor)
- Cricket Pitches
- Athletic Running Tracks
- Grandstand Seating
- Court and Field Fencing
- Sports Facility Lighting, Drainage etc.

Sports Facility Development

We are pleased to offer our customers expert advice based on their requirements, and a full service solution for any sports surface that they require. Our full solution includes everything from the original design, to the inspection and installation, and eventually the ongoing maintenance. The process of constructing a sports surface of exceptional quality begins at the very beginning, with our staff going to the site to perform the original pre-inspection so that we maintain control of the construction and installation process, thereby guaranteeing quality.

After that stage a design is finalised, the installation is planned by our technical design team working with the latest technology to ensure precision installation of drainage systems, sub-base and turf systems, depending on specific requirements. We will work to complete the project in the agreed timeframes and at an affordable cost. To provide an example of the work we do, a new sports club could contact us to develop a football facility consisting of a number of indoor and outdoor pitches. Constructing outdoor full size pitches to FIFA standard, our development would include drainage systems, earthworks, lighting, fencing, as well as the maintenance of these fields. The outdoor fields could be built with instant grass, synthetic grass or AstroTurf. Indoor fields would be created with AstroTurf and grandstands.

Sports Facility Maintenance

We design all sports systems and facilities to ensure a consistent world class surface that conforms to international standards, and follow up the installation with specific maintenance of the facilities. Sports facilities inevitably deteriorate over time, which is why we undertake a carefully constructed maintenance regime, so that the product life of the sports facilities can be extended, producing maximum value for our client's investment. We develop an extensive maintenance and testing programme for the installation that can be carried out internally under contract or by the client's own maintenance staff following our comprehensive training.

Fencing

Along with sports surface construction, we also have experience and expertise in erecting fencing. We manufacture and install palisade fencing, razor spikes, pool fencing, fast fencing, shade ports, carports and custom security fencing. The company can supply any type of steel palisade coupled with the widest range of designs and specifications in the market, built with custom requirements and affordability in mind.

Tar Surfacing

Tar surfacing is another area in which we produce quality results, whether involved in new tar surfacing or repairs to damaged tar surfaces, roads or paving. Our track record of completed projects is impressive; and adding elements such as fencing and tar surfacing to our repertoire has allowed us to continue our growth.

LANDSCAPING DIVISION

Our Landscaping & Garden Services is an established division of the company with expertise that range across a variety of professional gardening and landscaping service options. Nature is important to us, and it is our mission to provide services that allow our customers to enjoy their garden and outdoor areas to their full potential. By maximising their outdoor space and taking care of maintenance, we contribute to an oasis from the hustle and bustle of daily life, and allow our customers to reconnect themselves and the people who will enjoy the space with nature.

We provide garden services, weeding, tree felling, bush clearing, grass cutting, rubble removals and any other garden maintenance to residential properties, schools, municipalities, corporates and other organisations or institutions that require our expertise.

This division is dedicated to imparting the best customer service in all projects that we are involved in, pledging to exceed expectations through our knowledge, understanding and commitment to completing each project to a high standard and in the desired timeframe. Landscaping is our passion, and this shines through in our work.

Based in Johannesburg, our members of staff work to fulfil the requirements of each particular job with a special focus on ensuring that our clients are all considered as individuals and not simply one more project to complete. This allows us to develop strong relationships with suppliers, stakeholders and the customers themselves, which leads to satisfaction of a job well done. Perhaps the best indication of our quality is present in the fact that our repeat business statistics are high, showing our value to the customers we deliver services to.

We work hard to provide our customers with affordable products and services delivered by experts on-site. Our design experience and expertise set us apart from our competitors, and our willingness to be of service endears us to our growing pool of customers. The below is a selection of gardening and landscaping services that we are able to offer our valued clients:

- Artificial Grass - Astro Turf
- Bush Clearing
- Industrial Grass Cutting & Maintenance
- Landscaping
- Irrigation
- Grass Cutting
- Rubble Removal
- Refuse & Green Waste Removal
- Tree Care and Arborist Services
- Tree Felling
- Weeding and Removal
- Main Roads / Highway Grass Cutting & Maintenance
- Streets & Intersection Grass & Weeding Maintenance
- Industrial Bush Clearing
- Auditing
- Comprehensive Garden Maintenance
- Water Feature Construction & Maintenance

SOME OF OUR COMPLETED PROJECTS

We are able to showcase a portfolio of completed projects that display the company's ability to respond to any challenges faced and evolve to ensure that they are met and overcome. Our ability to work well with other construction-related firms towards a common goal has been proven throughout many partnerships and joint-ventures over the years, adding to our value as a company. Below are some selected from the many completed projects we have under our belts.
